

Stroud
District
the natural place

**We are a district of: Changemakers,
disruptors, innovators, environmentalists,
inventors, creators, progressives,
entrepreneurs, engineers, futurists,
gamechangers...**

Stroud is the natural place to locate a green tech or climate conscious organisation.

We live green and think big.

We are progressive with our approach to tackling the climate and ecology.

We communicate, challenge and look after each other.

Our climate strategy seeks to protect our district's character and communities.

We nurture home-grown talent.

We are connected yet distinct.

Stroud District is pioneering.

We develop and attract creators, big-thinkers and changemakers.

It's beautiful here.

Our Vision and Ambition

Our Vision for the future of Stroud District is rooted in the environment. We will develop and nurture our communities and spaces while staying true to our commitment to become carbon neutral by 2030.

An example of best practice nationally and internationally.

In 2018/19 alone, Warm and Well in Stroud saved 32.95 tonnes of CO2.

Hydro-electric generation at Dudbridge has so far produced 480MWh of electricity, saving 252 tonnes of CO2 emissions to Spring 2020.

1 in 19 homes (approx. 5% of all homes) have photovoltaic panels to generate their electricity from sunlight, nearly a quarter of these are council owned.

How can you get involved?

Become a Changemaker

We are a district of changemakers, disruptors, innovators, environmentalists, inventors, creators, progressives, entrepreneurs, engineers, futurists, gamechangers...

The Ambassador Programme

How businesses can support shape the prosperity of the district, promoting businesses and driving good practices amongst businesses
